

 Agentic Centre · private AI agents

Private AI for every department.

AI agents that take on the everyday paperwork, on your own server.
Your team stays in control.

Sound familiar?

Purchasing

Every PO means checking stock, finding the last price and chasing three suppliers.

Supplier A

Waiting

Supplier B

Waiting

Supplier C

No reply

What if the draft PO was waiting for you?

Finance

Month-end means a pile of supplier bills to match and key in.

What if every bill arrived already matched to its PO?

Sales

Quotes sit in an inbox while the customer moves on.

What if no quote was ever forgotten?

Customers

Customers message after hours and wait until morning.

What if simple questions got an answer straight away?

Know-how

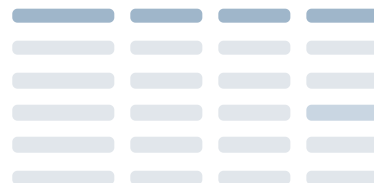

Only one or two people know how things are done.

What if anyone could just ask?

Management

A simple question about spend or stock takes a day of spreadsheets.

What if you could ask, and see the chart?

A day in purchasing

THE REQUEST

**We need 200 pcs of part ABC.**
